About Me

Seasoned technology leader with 14 years of experience in software engineering and engineering management. I have architected and scaled distributed systems serving millions of users, built and mentored high-performing engineering teams, and led cross-functional product delivery across Europe and North America. I thrive in fast-moving environments where technical excellence and business impact go hand in hand.

Work Experience

VP of Engineering — TechScale s.r.o., Prague, Czech Republic

March 2021 – Present

- Directed a distributed engineering organization of 45 engineers across 6 product teams
- Architected migration from monolithic Rails application to microservices on AWS, reducing infrastructure costs by 34%
- Established engineering hiring pipeline, scaling team from 18 to 45 engineers in 18 months
- Led delivery of core SaaS platform reaching 2.1M active users
- Spearheaded adoption of CI/CD practices reducing deployment frequency from weekly to 40+ deploys per day
- Mentored 4 senior engineers into engineering manager roles

Senior Engineering Manager — DataFlow GmbH, Berlin, Germany

January 2018 – February 2021

- Managed 3 engineering teams (22 engineers) delivering real-time data pipeline infrastructure
- Designed and owned data ingestion platform processing 8TB of events daily using Kafka and Spark
- Coordinated quarterly roadmap planning with product, design, and business stakeholders

- Drove adoption of Terraform and Kubernetes, reducing environment provisioning time from 3 days to 2 hours
- Delivered GDPR compliance project across 12 engineering teams on time and under budget

Lead Backend Engineer — Innovatech Ltd., London, United Kingdom

June 2015 – December 2017

- Led backend team of 8 engineers building financial data aggregation platform
- Architected PostgreSQL to distributed database migration supporting 10x traffic growth
- Optimized critical API endpoints reducing p99 latency from 1200ms to 85ms
- Established code review culture and engineering onboarding documentation
- Collaborated with CTO on technical strategy and quarterly OKR setting

Senior Software Engineer — CloudBase Inc., Brno, Czech Republic

August 2012 – May 2015

- Designed and built RESTful APIs in Python and Django serving enterprise clients
- Delivered machine learning pipeline for customer churn prediction (AUC 0.87)
- Built internal developer tooling reducing boilerplate setup time by 60%
- Contributed to open source projects including a widely used Redis caching library

Education

Master of Science — Computer Science

Czech Technical University (ČVUT), Prague
September 2010 – June 2012

Bachelor of Science — Software Engineering

Brno University of Technology (VUT), Brno
September 2006 – June 2010

Skills

Category	Skills
Languages	Python, Go, Java, TypeScript, SQL
Frameworks	Django, FastAPI, React, Spring Boot
Infrastructure	AWS, GCP, Kubernetes, Terraform, Docker

Category	Skills
Data	PostgreSQL, MongoDB, Redis, Kafka, Spark
Practices	Agile, Scrum, CI/CD, TDD, System Design
Tools	Git, Jira, Confluence, DataDog, GitHub Actions

Languages

Language	Level
English	Native
Czech	Advanced (C1)
German	Intermediate (B1)

Interests & Hobbies

Active open source contributor with 3 published libraries on GitHub. Regular speaker at Prague DevMeetup and PyConCZ. Mentor at CoderDojo Prague teaching programming to teenagers. Personal blog on distributed systems architecture with 4,000 monthly readers.

Certifications

- AWS Certified Solutions Architect — Professional (2022)
- Certified Kubernetes Administrator (CKA) (2021)
- Google Cloud Professional Data Engineer (2020)
